

STELA

Discover the Earliest Posts

[] [Start Excavation]

 **See how they started** — what they were, before they had followers, before the image they have today, and trace how that early voice took shape over time, post by post. Uncover what's been buried, keep excavating deeper into their past, and collect what you find along the way, building your own archive you can revisit, compare, and use as your understanding grows.

① Set up your account

Create an account to start excavating and get credits. Credits are required for excavation.

② Enter a username

Load any X account.

③ Start excavation

Stela digs into the account and shows you the earliest posts, along with engagement data and context from when they were originally posted.

④ Keep excavating

Continue in +100 post blocks whenever you want to go deeper.

Start from the very beginning.
